WHO WE ARE

The platform behind your daily operations

Nextosis Technologies is a technology startup focused on enterprise software, healthcare automation, and integrated security. Instead of building every system from scratch, we built Nextosis Platform: one secure foundation for identity, permissions, audit, and notifications, with business modules on top, configured to your workflows and connected to the hardware you already own.

How Nextosis Platform is built

PRODUCTS	Clinic · Hospital · Queue · Secure · Visitor · Workforce · Asset & Inventory · AI & Integration
BUSINESS MODULES	Patients · Clinical · Lab · Pharmacy · Beds · Billing · Queue · Security · Attendance · Inventory · AI
PLATFORM SERVICES	Identity · Permissions · Organizations · Notifications · Audit · Licensing · Integration
DEPLOYMENT	SaaS (cloud) · On-premises

Your choice of deployment

	SAAS (CLOUD)	ON-PREMISES
Where it runs	Hosted and managed by Nextosis	Your own servers and network
Commercial model	Subscription	License
Best for	Fast start, no servers to manage	Full control of data and infrastructure
Updates & support	Managed by Nextosis	Delivered by Nextosis on your servers
Product features	The same products and features in both models	

Built into every product

- ✓ **Role-based access** for every screen
- ✓ **Full audit trail** of user activity
- ✓ **Multi-tenant** with separate data
- ✓ **Web, mobile & kiosk** access
- ✓ **Hardware integration** for CCTV & biometrics
- ✓ **Open APIs** REST, HL7, FHIR

HEALTHCARE & PATIENT FLOW

Clinic, hospital and queue management

From the reception desk to discharge: registration, consultations, labs, pharmacy, billing, wards and patient queues on one system.

OUTPATIENT CARE

Nextosis Clinic

Complete outpatient clinic management, from the front desk to the doctor's room, lab and pharmacy counter.

- Patient registration and records
- Appointments and scheduling
- Triage and vitals
- Doctor Desk for consultations
- Diagnosis and e-prescriptions
- Lab orders and results
- Pharmacy with batch-wise stock
- Billing, receipts and refunds

INPATIENT CARE

Nextosis Hospital

Inpatient and ward management for hospitals, built on the same patient records as Nextosis Clinic.

- Admissions
- Ward, room and bed management
- Bed transfers
- Doctor round notes
- Nursing charts
- Medication orders and administration
- Discharge summaries
- Nurse shifts and rostering

QUEUE MANAGEMENT

Nextosis Queue

Token-based queue management for hospitals, banks and government service centers.

- Self-service token kiosks
- Counter and room assignment
- Live display screens
- Priority queues
- Patient flow routing between departments
- Wait-time estimates
- Queue analytics and reports
- Works with Nextosis Clinic or on its own

SECURITY, PEOPLE & OPERATIONS

Security, visitors, HR attendance and inventory

Secure your premises, manage visitors and staff attendance, and keep stock under control, all with the same logins and permissions.

INTEGRATED SECURITY

Nextosis Secure

Connects on-site NVRs, cameras and access controllers through a secure, outbound-only Site Agent.

- CCTV and NVR integration
- Video analytics: occupancy and traffic counts
- Access control and schedules
- Alarms and security incidents
- Guard patrols

VISITOR MANAGEMENT

Nextosis Visitor

Know who is on your premises, why they are there, and when they leave.

- Visitor registration
- Digital visitor passes
- Access groups and schedules
- Vehicle entry logs
- Vehicle presence tracking at the gate

HR ATTENDANCE

Nextosis Workforce

Staff attendance synced from biometric terminals across departments and locations.

- Biometric terminal sync
- Shifts and timetables
- Attendance policies
- Holidays and leave management
- Departments, areas and positions

INVENTORY & PROCUREMENT

Nextosis Asset & Inventory

Stock and purchasing across one or many warehouses.

- Warehouses and categories
- Suppliers and purchases
- Goods receipts
- Batch tracking
- Stock transfers and adjustments

Nextosis AI & Integration

OCR and document processing, AI chat over your organization's knowledge base, and predictions. Connect other systems through REST APIs, API keys, webhooks, HL7, FHIR and MQTT.

Nextosis Mobile

Android and iPhone app for staff with Face ID and fingerprint unlock, role-based home screens, and a mobile Doctor Desk for calling patients and completing visits.

FEATURED CAPABILITIES

Video analytics & GPS staff attendance

Turn the cameras you already have into live insight, and know where your field staff are, with attendance they can't fake.

NEXTOSIS SECURE

Video Analytics

AI models run on-site through the Nextosis Site Agent and work with your existing CCTV cameras and NVRs. Video stays on your premises; only events and counts go to the dashboard.

- People counting and occupancy charts per camera
- Crowd and queue alerts for busy waiting areas
- Intrusion alerts in restricted areas out of hours
- Vehicle counting by type: car, motorcycle, bus, truck, bicycle
- Traffic counting by direction across a counting line
- Number plate recognition with a parking log of arrival, departure and time parked

Ideal for: hospital waiting areas, office and campus gates, car parks, warehouses and public service centers.

NEXTOSIS WORKFORCE

GPS-Based Staff Attendance

Staff check in from the Nextosis mobile app on Android and iPhone, alongside the biometric terminals you already use, with every check-in tied to a real place and a real face.

- Geofenced check-in, accepted only inside the site's GPS radius
- Face check with a short video and a head-movement liveness test
- Faces registered with consent and approved by a manager
- QR check-in with a site code that changes every 30 seconds
- Field duty tracking: route, distance travelled, site arrivals and departures
- Works offline: records upload when signal returns

Ideal for: field sales and service teams, security guards, nursing and home-care staff, and multi-site organizations.

INDUSTRIES

Who we build for

Organizations that serve many people every day and need their operations, records and premises under control.

Clinics & Hospitals

Outpatient and inpatient care, labs, pharmacy, queues.

Clinic · Hospital · Queue

Warehouses & Distribution

Stock, purchasing, shift attendance, gate security.

Inventory · Workforce · Secure

Corporate Offices & Campuses

Visitors, access control, CCTV, attendance.

Secure · Visitor · Workforce

Government & Public Services

Citizen service centers and secure offices.

Queue · Secure · Visitor

Banking & Finance

Branch queues, customer flow, branch security.

Queue · Secure

Residential & Gated Communities

Visitor passes, vehicle logs, cameras.

Visitor · Secure

How we work

01

Consultation

We assess your requirements, constraints and compliance needs.

02

Solution Design

We define workflows, integrations and security up front.

03

Configuration & Integration

We configure Nextosis Platform and connect your systems and hardware.

04

Deployment & Support

We go live on our cloud or your servers, train your team, and support you.

See Nextosis Platform in action

Tell us about your organization and we'll walk you through the products that fit, on our cloud or on your own servers.
